### We've Got Rhythm

Donne & Cavalli (Italian for "women and horses"), purveyors of botanical skin-care products for equestrians, introduces something a little different: Rhythm Bead Necklaces—for horses, not for people.

Strung with beads and bells and available in a variety of colors and themes, the necklaces sound softly in time with the horse's footfalls—a handy aid if you're working on rhythm or tempo. On the trail, the sounds may help avoid startling wildlife. And to help you and your horse get into that happy place, some beads contain soothing essential oils.

Donne & Cavalli says that, for safety's sake, the necklaces will break should they snag on an object.
